2. Citations and explanations (Rule 70.7)

The present invention relates to a protection gear for removing and scavenging harmful insects.

(1) Reference is made to the following document:

D1 : US 5,091,993 A

D2 : JP 10-096108 A

(2) Novelty and Inventive Step

D1 relates to an insect proof garment made of a lightweight semi-rigid insect excluding mesh comprising a part for guarding an upper body of a wearer composed of a head net, an upper body portion, and sleeves in one piece, and a part for guarding a lower body of a wearer.

D2 relates to an insect-proof suit made of net-like cloths comprising a jacket including a head cover and trousers, wherein a protection sheet made of compact raw material is attached on each joint part.

The protection net of claim 1 of the present invention is similar to mesh or net-like cloths of D1 and D2 in the purpose of protecting the human body against harmful insects. However, the technical feature of a protection gear of which each component for protecting the head, the body, arms, hands, legs, or feet is separately worn with each fastener is not disclosed in D1 and D2.

Accordingly, claim 1 directed to a protection gear against harmful insects and claims 2-6 dependent on claim 1 are novel and inventive under PCT Article 33(2)-(3).

(3) Industrial Applicability

There is no reason for denying industrial applicability of the present invention.
